Parent Comments:

- Who to contact to speak about graduation requirements and/or lack support at home and other personal issues that may affect student's progress in school.
- My child is a 9th grader who has recently been diagnosed with ADHD and I feel most of his teachers and administors aren't implementing the 504 plan. I'm constantly calling and emailing sometimes with no response and I feel like my son doesn't matter much at this school.
 - I think we're forcing our kids to do too much. School has become like a job for many of them. More work does not equate to more successful students. Give them a break.

Additional Parent Comments:

- The lack of parent participation is having a very negative impact on the quality of learning at Shiloh High. When you have a climate where the parents don't care, it causes the teachers and administrators not to care either.
- If needed to set up an appointment with an attendance issue. How long do you have to wait for an reply. Cause I have been emailing an staff member that seems like is so busy that I cannot get a call back nor an email reply. So what is wrong with this picture?
 - love shiloh
 - it would be a benefit to Shiloh students and parents if Shiloh could partner with and provide information on local college students who are available and qualified for tutoring in core subjects through their school's student involvement department for a fee which the parent would negotiate and fund.
- None !! We love shiloh high school . My child is learning so much with cool teachers. They teach the way the kids can understand that's great what else a kid and parents need.
- Shiloh High has become absolutely HORRIBLE at communication. This is the 5 year at that high school (between two children) and each year they have a new parent representative and each one is worse than the prior. We received communication in the mail just THIS WEEK (2/10) that was dated January 26 regarding credit recovery which started January 19. This is unacceptable. The school website is not being updated regularly and communication just really lacks this year. More timely announcements to the parents would help. And the teachers need to update the portal on a timely basis. Only updating it when progress reports are due to come out is not beneficial to those parents like me who actually take an interest in their child's education.
- Recovery class registration was jan. 20 to feb.6. I received the letter on feb.6th when I got home from work. The letter was dated Jan. 26th. So this tells me they sent it out late. People need more time b/c these classes cost. so now my child cannot do recovery class. His counselor has not called with concerns of him falling. Teachers send emails once in a while but most of the time i cannot open the email something with attachment or something i font know about. My child is getting left behind. 9th grade should be 10th but about to be next school year.... 11th.
- The school is doing a good job with the parent forum. However, when you have the principal who do not return calls or play phone tag, relationships suffer and the teachers. I question the school culture and teacher morale.
 - deben dar información sobre el calendario que deben seguir los alumnos y así los padres estar enterados de todos los trabajos o exámenes futuros. Y algunos administradores no son amables.
